

STATEMENT OF PURPOSE

RS22376

This bill will allow the Board of Drinking Water and Wastewater Professionals to remove the license reinstatement restriction for drinking water operators. This change allows a licensee to reinstate their lapsed license in the same manner as other licenses issued by the Board. This will allow the renewal process to be consistent for all licensees.

FISCAL NOTE

There is no impact on the General Fund. There may be a small impact on the Board's dedicated fund depending on the number of people who let their licenses expire. It is estimated that this would affect one to two people per year and could increase the Board's balance by \$100 to \$200 per year. It would save the licensee the expense of re-examination.
